A Student Guide to Field Study

The Field Study Program was developed as a School of Social Ecology undergraduate degree requirement to immerse students in rigorous, innovative, and engaged learning both in the classroom and through active participation in our community.

ABOUT FIELD STUDY

To complete their School of Social Ecology Field Study requirement, students enroll in a field study course while completing 80 hours of fieldwork throughout the quarter at an approved field placement site.

In the classroom, students engage with faculty and one another through lectures, discussions, writing, and presentations, synthesizing their fieldwork with theory, paradigms, and ideas learned about in their coursework.

With faculty guidance, students explore and develop professional competencies that complement their fieldwork experiences and prepare students for future graduate school and career goals.

During field placement, supervisors provide guidance and mentorship to foster students' professionalization and community engagement, while students thoughtfully contribute to the organizations' programming and help support the communities they serve.

Students have the opportunity to explore a career field, observe and participate in organizational operations, and develop their interpersonal and technical competencies in a supportive, professional learning environment.
