	About the Organization:				
	The mission of the Department of To harmful effects of toxic substances to pollution prevention. DTSC is comprigeologists, toxicologists, and public colleanup, enforcement and restoration through public outreach to keep the pour website at: http://dtsc.ca.gov/in	hrough the restoration of conta sed up of a multi-disciplinary st outreach specialists. Our agency on, but also strives to maintain o public involved in DTSC's decisi	minated resources, enforce aff including environmental not only deals with enviror open communication with the onmaking processes. For mo	ement, regulations and scientists, engineers, smental surrounding community	,

About the Field Study Placement

Students play an integral part in assisting DTSC staff in coordinating, tracking, producing and reviewing documentation for various programs under the Brownfields and Environmental Restoration Program at DTSC. Supervision is provided directly from the DTSC Brownfields Coordinator and from other staff that assist in task related to environmental restoration and remediation projects within the Program. Students are responsible for taking ownership of work and applying their knowledge of environmental sciences. We expect students to seek answers and ask questions on topics as needed to complete their work. DTSC staff will provide training and guidance to augment the student's understanding of the regulatory or environmental investigation/cleanup process. Students may have the opportunity learn and practice skills in one or more of the following areas - conducting an evaluation of environmental remediation projects, assist with projects within the Targeted Site Investigation (TSI) Program, updating DTSC website content and social media integration with current communication strategies, setting-up marketing strategies, coordinating logistics and registration process for public information workshops, and assisting in updating Brownfields policies for Voluntary Cleanup Program.

Requirements

Strong written and verbal communication, proficient in MS Office programs, familiarity with environmental regulatory processes, ability to work proactively and engage staff for clarification. 2 qtrs. Preferred. Available in 4 hours blocks.

How to apply for a placement

Email cover letter, transcript, resume, and list of three references to DTSC points of contact. Oath of Allegiance and Declaration of Permission to Work for Persons Employed by the State of CA (STD 689) need to completed and signed prior to Field Work.
