Field Study

FIELD STUDY HOURS LOG

All field study students are strongly encouraged to keep a log of the hours spent at their field placement site. At the end of each quarter, field placement supervisors are required to evaluate the student's work at the placement; this evaluation includes a tally of the number of hours each student spent at the placement site and a log or timesheet to prove the completion of hours. This log can be used, but it's NOT the default or required format. Supervisors are at liberty to use their preexisting forms and logs.
